Medicinal Properties of Tulsi

Tulsi, also known as Holy Basil, is one of the most valued medicinal plants in India. It has been used for centuries in Ayurveda for its healing properties. Tulsi leaves contain essential oils and compounds like eugenol, which have antibacterial, antiviral, and antifungal properties. This makes it an effective remedy for colds, coughs, and respiratory infections.

Apart from boosting immunity, Tulsi is also known for its ability to reduce stress and anxiety. Drinking Tulsi tea can help calm the mind and improve overall well-being. The plant is also beneficial for digestion, as it helps reduce bloating and indigestion. Additionally, Tulsi has antioxidant properties that help in detoxifying the body and keeping the skin healthy.

Many people grow Tulsi at home because of its spiritual and medicinal significance. It is often used in religious rituals and is considered sacred in Hindu culture. Regular consumption of Tulsi leaves can contribute to a healthier lifestyle by improving heart health, reducing inflammation, and protecting against infections.

CASE-STUDY BASED QUESTIONS

Q.6 Read the source given below and answer the questions that follow:

(4x1=4)

Fuels are essential for powering our world, and they come in two main types: renewable and non-renewable. Renewable energy sources, such as solar power, wind power, and hydropower, can be replenished naturally and are more environmentally friendly. Non-renewable energy sources include coal, petroleum, and natural gas, which are extracted from the Earth and cannot be replaced quickly once they are used up. Coal is often used in power

plants to generate electricity, while petroleum is refined to produce gasoline, diesel, and other important products. It is crucial to conserve these fuels to protect our environment and ensure they are available for future generations. Conservation efforts include using energy-efficient appliances, driving less, and investing in renewable energy technologies.

(a) What are the two main types of fuels?

- (i) Solid and liquid
